Road plate

1400mm x 1200mm

Works with our Modular road plates.

Lumi® Technology

Solar lamps ensure an advanced safety solution for pedestrians during street works.
A UK first, no other company has this patent pending and design registered technology.

Approved to 6,000kg SWL

The Road plate has been designed to provide a safe means of maintaining traffic flow, during excavation work on roads, where reinstatement of the excavation would be inappropriate at that time.

The Road plate has been designed to provide a safe means of maintaining traffic flow, during excavation work on roads, where reinstatement of the excavation would be inappropriate at that time. The Road plate is designed to allow the passage of most vehicles including HGVs up to the normal weight restrictions. It is important that the recommended installation procedures are followed to ensure both safety and correct usage.

- Lightweight, easy to lift and install by 2 people.
- Capable of safely supporting a load of 6 tonne.
- Manufactured from glass reinforced plastic, the products have no scrap value thus eliminating on-site theft problems.
- The product neither warps or delaminates in adverse weather conditions.
- High non-slip surface - even when wet.
- Improved Public relations (smart appearance and high safety levels).
- Anchor pins are available for use with bitumen and concrete surfaces.
- Easy to clean and maintain.

Applications

- The Road plate is designed to cover trench excavations of up to 700mm.

Weight

- 1400mm x 1200mm Road plate - 47 kg.

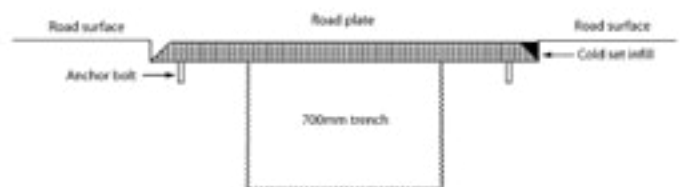

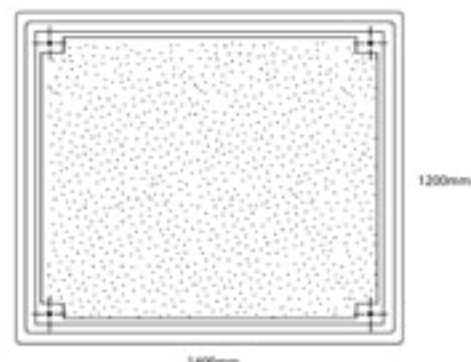

Safety

- High strength.
- Lightweight, for ease of use.
- Exceeds HSE slip resistance.
- Non-trip.
- Recessed fixing holes provided at each corner.
- Complies with the safety at street works and road works code of practice.

Approved by Transco, most local authorities and utility companies, Tricel safety products are a highly cost effective solution to site safety and access, and are fully compliant with UK & European Legislation.

- Department for Transport (Safety at street works and road works, October 2013)
- Department for Transport (Practical guide for street works, June 2006)
- DETR (Best practice in street works and highway works, 2001).
- Transco: (T/SP/E42. Technical specifications for footway boards, ramps and road plates).
